Edbak Core Values

We respect every employee and customer. We take time to listen carefully and talk like partners. We support each other and play in one team with a common goal in mind. In this synergy, we act in an organised, coherent and efficient manner. We enjoy working together and succeeding together - that is how we achieve a strong leadership position and become a dynamically recognisable brand in the market.

partnership

engagement & responsibility

We involve staff in decisions concerning the operation of the entire production site. Each employee takes responsibility for actions within their area of responsibility (extreme ownership). This translates into greater commitment and motivation - as a result, employees participate proactively in the genuine development of the company.

We strive to be a creative and innovative organisation in terms of the products and solutions offered. We make every effort to ensure that our production technology is of the highest standard and that the company is managed in an ethical, economical and modern way. We create useful products and solutions that connect people with technology. We support the future.

creativity & innovation

improvement & development

We have been continuously perfecting the craftsmanship that triggers so many challenges to the industry. It's been 32 years. We are constantly looking for new ways to train our employees diligently and optimise our production processes. We are strong locally and recognised globally. This fills us with pride and humility. We look for new markets and develop new products. We invest in modern technologies while keeping tradition in mind.

We pursue our goals and conscientiously adhere to agreed rules. We always treat other people, colleagues, customers and suppliers with respect. We are aware that a company is made up of people, which is why we make sure that everyone in the organisation is in their rightful place feeling indispensable. This approach integrates and engages the entire plant community and, in the eyes of our business partners, we are a reliable manufacturer and provider of excellent solutions.

professionalism

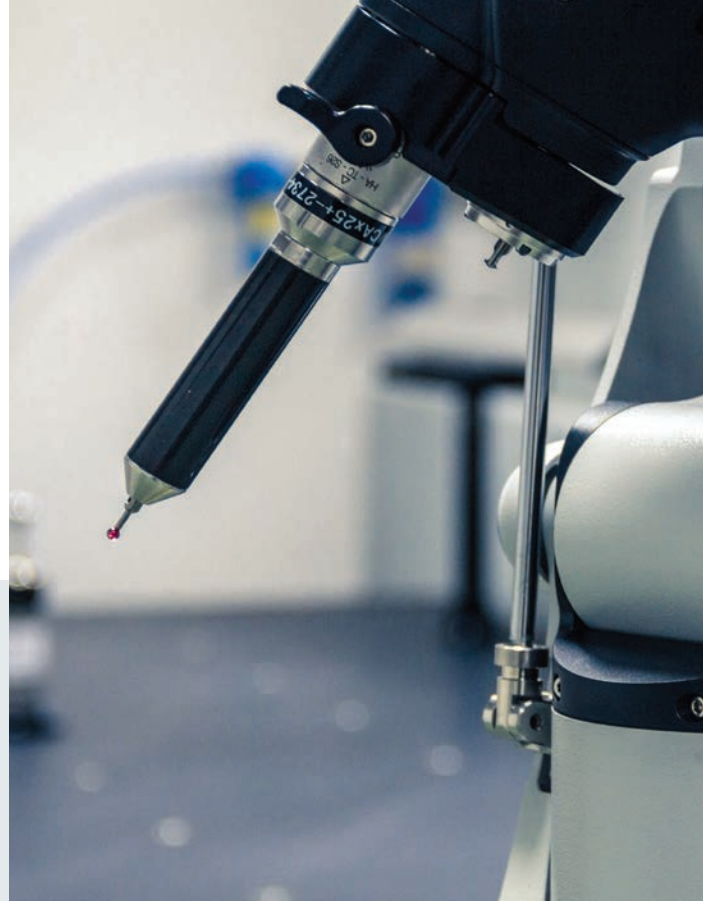

WE ARE

EDBAK is a Polish, family-owned company – manufacturer of mounting systems. The company was founded in 1992 and has been the expert in metal manufacturing ever since. Also, EDBAK has been a leading European manufacturer of AV solutions ranging from display mounts, wall brackets, conference trolleys, stands, desktop monitor mounts, dedicated systems for LED, video wall mounts, and info kiosks. All items are made in Poland.

The company is distinguished for focusing not only on selling standard, ready-made solutions but also on providing products that meet the requirements of the end customer through the investments of business Partners and integrators. EDBAK does its best to deliver added value, making sure all products are safe, durable, quick to install and ergonomic. By choosing EDBAK you can be sure to receive superb pro AV mounting solutions.

You have our support from the start. For 32 years.

Made in Poland

We design and make all of our products here in Europe ensuring that both quality and design reflect our common heritage and culture. Our EDBAK Research and Development office can provide more appropriate and more timely response to your needs for customization as well as for products. And the shipping is easier, faster and safer when you know it is coming from central Europe.

Video Conference Trolleys

Video conference trolleys are the excellent choice for those looking for a practical solution that meets the highest expectations. They have been designed to provide comfort during a video conference, speech or public presentation. Conference trolleys are perfect for all professional applications in conference rooms, office rooms and educational facilities. They are mobile and practical in any arrangement due to their ergonomic shape and stable aluminium structure.

Videoconferencing trolleys are equipped with a system that protects the monitors against falling and ensures intuitive adjustment of screens height. AV accessories, such as a laptop or camera, can be placed on shelves that are fitted directly to the vertical column. In addition, the integrated cable management system provides smart installation and makes the finished solution look very aesthetic.

Stands

Stand is an absolutely great solution for presenting the screen in an elegant and safe manner at the same time. Our products are universal and, due to their wide range of height adjustments, they can be easily adapted to many types of screens available on the market. A solid and stable base with the possibility to fix it to the floor makes it a perfect match to hotel lobbies, conference rooms, etc. Integrated cable management makes the finished installation neat and tidy. Above all, free standing product is a perfect choice for professional or commercial applications.

Projector Mounts

A solid and safe projector mount is the basis of each audiovisual installation.

The bracket is characterised by a load capacity adjusted to the weight of the device and offers protection against accidental falling out.

It ensures the correct position of the projector in relation to the screen so that the projected image is of the best quality.

The bracket is characterised by the precise and comfortable adjustment of the distance to the wall and the possibility to hide the cables by the integrated cable management system.

Modern design and aesthetics of the projector mount are its unquestionable advantages. The mounts match even the most prestigious interiors.

Bespoke Solutions

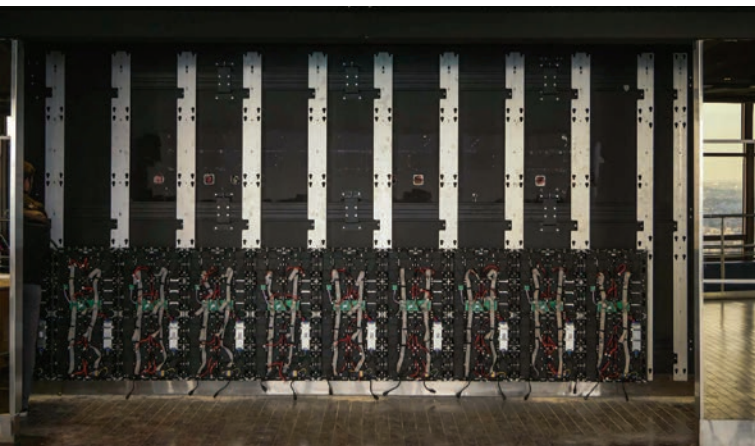

Successful business starts with great partners

Edbak shares an extensive business partnership with local and global distributors, integrators as well as each client that requires a reliable product or bespoke solution.

The more demanding, the better.

We are friendly, professional and open to new projects, always ready to discuss Your investment.

Edbak is much more than ready-made AV products. We share know how and support our business partners with solutions that bring spectacular results. At the end of the day it's all about being flexible, complex and professional when it comes to each project.

The company has its own design office and R&D department where Edbak designers use CAD Autodesk Inventor, SolidWorks and CAM NX-CAM software, delivering a comprehensive and highest quality of service. This, quite often, features truly demanding requests of our clients.

Reliable and solid solutions are never delivered without a proper quality check. Hence Edbak owns its own research and measurement laboratory to fully control the quality of all rendered services. Each product goes through a thorough quality control process.

According to one of our core values, we constantly improve and develop to generate added value.

Our business partners can confirm that Edbak provides **products that communicate the best solutions.**
