My Home is my Office.

Comfortable. Flexible. Secure.

The demands on a home office workplace increase with the requirements.

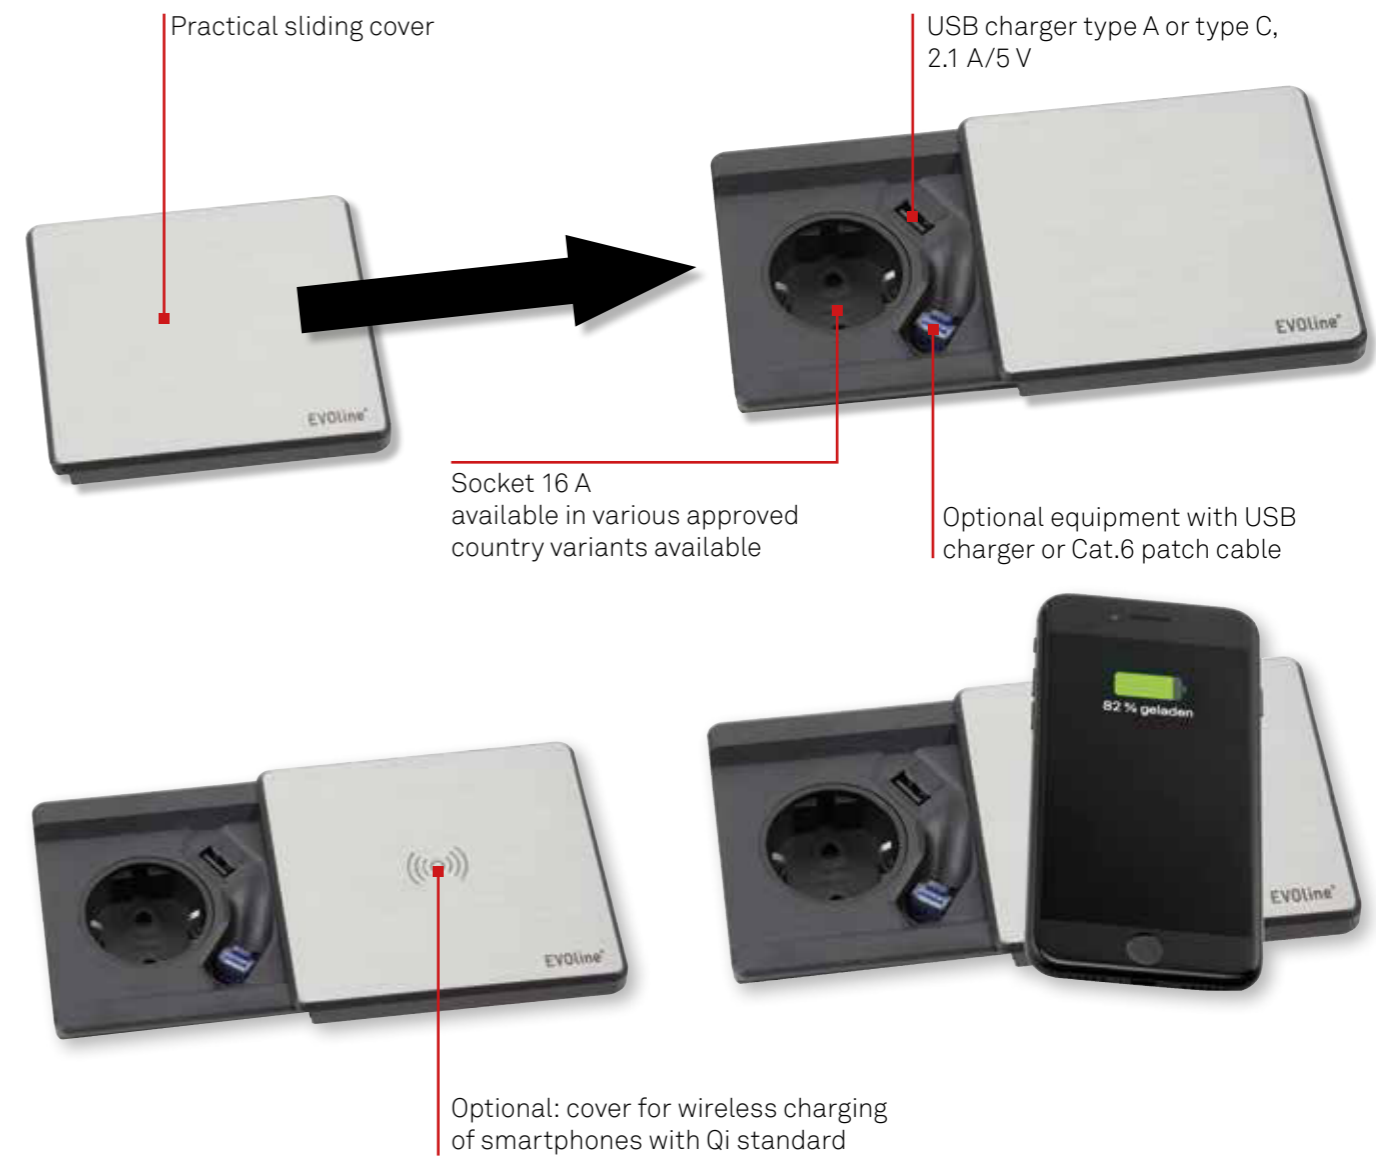

No cumbersome cable laying,
direct access to power and data connections,
quick uninstallation if necessary and
of course electrical safety.

All that counts.

The allrounder in your desk

Designed for 80 mm standard cable glands.

The touch of a finger is enough.

The FlipTop Push opens at the touch of a finger and reveals the way to the connections. By gently pressing on the cover, the bar disappears in the surface again - even with cables connected.

Sophisticated down to the last detail - not only for professionals.

The EVoline FlipTop Push is an elegant built-in solution for all work areas, that need to be supplied with power, data and multimedia connections. Interchangeable modules at any time. Quick and easy assembly or disassembly.

The mobile organiser.

The Up follows you wherever you go.

The Up organises the most important connections and bundles them easily accessible within immediate reach, where they are needed.

The vertical multiple socket can be ordered with USB chargers in different versions and international power socket modules.

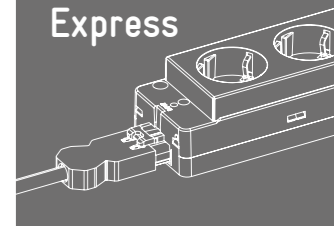

With the help of adhesive strips, the Up can be quickly and securely attached to any work surface - even glass - and removed again without leaving any residue if necessary.

Available surfaces

Black, silver or white.

Bolted mounting on a solid surface is also possible.

Safety first.

Leave nothing to chance.

EVLine Express, for more security in your home office.

The Express is made of self-extinguishing and flame-retardant plastics.

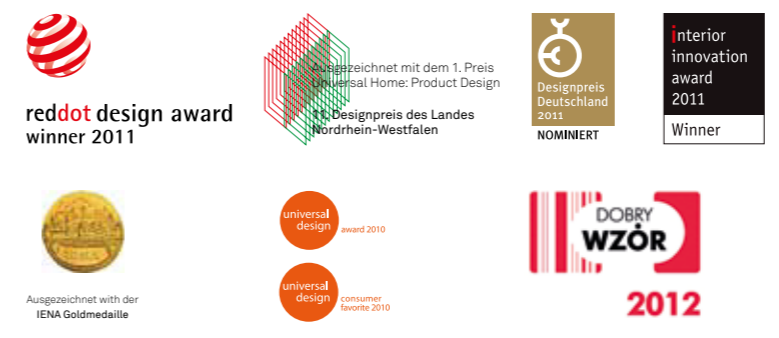

The EVLine Express separates sensitive circuits from each other and ensures operational safety.

No room? Does not exist!

The EVoline Plug is extremely flat and fits behind any cupboard.

The extra-flat EVoline Plug fits easily behind any piece of furniture. Its intelligent articulated mechanism turns the handle into a lever.

so that the plug can be removed from the socket without any effort. Even with a strong jerk on the cable, the plug slides out of the socket without damage.

Order creates security.

EVOLine Bridge, WireLane or Rail ensure orderly line/cable routing.

Cable Management

Especially in the home office, these problems always crop up frequently.

Sockets and data connections are not in the right place. Cables and lines have to be laid across the floor. Tripping hazards and mess are pre-programmed.

Take advantage of the professional benefits of EVOLine Cable Management.
